DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(a)-(d) based upon an application filed in Italy on 08 May 2004. A claim for priority under 35 U.S.C. 119(a)-(d) cannot be based on said application, since the United States application was filed more than twelve months thereafter.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 6 March 2006 is noted. The submission is in compliance with the provisions of 37 CFR 1.97 and 1.98. Accordingly, the information disclosure statement is being considered by the examiner.

Specification

The abstract of the disclosure is objected to because it is in claim format. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities:

Page 2, lines 12 and 13 refer to the claims.

Appropriate correction is required.

Claim Objections

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so

Art Unit: 3745

as to avoid confusion with other numbers or characters which may appear in the claims.

See MPEP § 608.01(m).

Claim 1 is objected to because of the following informalities:

On line 9, "center line (1,1)" should read --center line (L1)--, and

On line 11, "center line (Li)" should read --center line (L1)--.

Claim 5 is objected to because of the following informalities:

On line 6, "20" should be deleted, and

On line 7, "(RI)" should read --(R1)--.

Claim 9 is objected to because of the following informalities:

On line 3, "(PIO)" should read --(XY)--.

Claim 13 is objected to because of the following informalities:

On line 3, "(X !-)" should read --(XY)--.

Claim 14 is objected to because of the following informalities:

On line 4, "(BG)" should read --(B6)-- and "foutted" should read --formed--.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The instant invention is deemed to be a non-obvious improvement in the art of axial fans. The improvement comprises the use of an axial fan having blades with a concave leading edge, convex trailing edge and several aerodynamic profiles having a centre line, i.e. chamber line, with values as claimed.

Art Unit: 3745

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent issued to Bradbury et al. discloses a state of the art axial fan with blades defined by Bezier curves. The patent issued to Spaggiari discloses an axial fan blade with a parabolic leading edge and circular arc trailing edge. The patent issued to erosion discloses a state of the art forwardly skewed axial fan blade.

Conclusion

This application is in condition for allowance except for the following formal matters:

The abstract, specification and claims need to be corrected as indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
